

Finally ... someone has put it all together.

9 1/2 Phillips Rating...the highest ever awarded.

ALL-WAYS IS THE BEST OF THE BEST... WHAT AN UNDERSTATEMENT!

COMPREHENSIVE HANDICAPPING

Most other handicapping programs are one dimensional, typically only pace handicapping. ALL-Ways software has powerful pace handicapping capabilities as well, even including Tom Brohamer's handicapping factors based on the Sartin Methodology. But, you cannot handicap by pace alone. ALL-Ways software includes 87 comprehensive handicapping factors covering each horse's suitability to the distance and surface, current form, class level and ability to handle the probable pace and speed demands of the race. ALL-Ways even includes extensive pedigree, jockey and trainer statistics. And, ALL-Ways key handicapping factors are not in the hands of the general public, giving you an important edge.

RACE TYPE AND RACE TRACK SPECIFIC

Most other handicapping programs are generalized for all race types and all tracks. ALL-Ways software knows exactly what combination of key handicapping factors work best for every type of race run at every track in North America, even taking into account the track bias and the pace match-up scenario in the race. ALL-Ways software uses this knowledge to automatically handicap appropriately for each individual race on the card.

STRONG EXOTIC WAGERING

Most other handicapping programs ignore lucrative Exotic wagering. ALL-Ways software not only does a great job of spotting the winning horse, it also specifically looks for and finds the most likely place, show and 4th place horses as well. It also looks at apparent "non-contenders" to see if one might just wake up today and score at a big price. ALL-Ways software also identifies the best Key Horse candidates for you to use in your Exotic wagers.

YOU ARE IN CONTROL

Most other handicapping programs provide a little data and ask you to have blind faith in the computer picks. ALL-Ways makes outstanding selections, a high percentage of which are not the crowd favorites. And, with the help of the ALL-Ways Impact Value Analysis, you can create your own personal handicapping profiles to be used at handicapping time. You can even instruct ALL-Ways software to automatically create handicapping profiles that look specifically for long shots. And, if you like, you can even export ALL-Ways data for use in popular spreadsheet and database software programs. In other words, you can have ALL-Ways operate automatically or you can take complete control or anywhere in between.

MULTIPLE HANDICAPPING METHODS

Most other handicapping programs use fixed methods to handicap a race. ALL-Ways software lets you use three different handicapping profiles simultaneously to handicap a race. You may want to use three profiles that look at the race three different ways. Most handicappers barely have time to handicap a race one way, let alone from three different perspectives. This is like having your own personal Consensus Picks.

CONTINUING INNOVATIONS

Most other handicapping programs are rarely updated after their initial release. Major upgrades have been released every year since ALL-Ways was first introduced. Besides the fact that ALL-Ways just plain works, this continuous stream of innovations has made ALL-Ways software the most widely used serious handicapping software in North America. Version 6 introduced the powerful and widely acclaimed concept of Race Pace Shapes. Version 8 introduced ALL-Ways Custom Card™ capability. This let's you define the kinds of races you want to play and then have Custom Card search all race cards being run at all tracks in North America and construct a custom race card made up of just the races you like to play at just the tracks you like to play. You can even specify how much pace pressure you want in the races such as races with lone front runners and/or races with a lot of early pace pressure that may set up for high priced closers. **This is the ultimate in "New Age" handicapping!** Version 10 introduced Custom Search Definitions that lets you define your own handicapping angles and have ALL-Ways actually check every horse in every race it handicaps to find the special horses that qualify for your personal angles. All told, more than one hundred new capabilities have been added to ALL-Ways software over the years.

EASY TO USE

Most other handicapping programs are laborious and tedious to use. ALL-Ways software was designed by handicappers ... for handicappers and not for computer gurus. There is absolutely no data entry. Just download the ALL-Ways data file and spend about 10 minutes at your computer to handicap an entire race card. Spend a few minutes with the powerful ALL-Ways handicapping reports and your wagers can even be planned before you leave for the track.

FREE PAST PERFORMANCE REPORTS

The ALL-Ways data file drives your ALL-Ways software. It will also print out the wildly popular BRIS Ultimate Past Performances in the familiar racing form format ... **absolutely free and one or two days before the race day and in the comfort of your own home. Wow!**
